

## About the Technion

Since its founding in 1912, the institute has educated generations of engineers, architects, and scientists who have played a key role in creating the State of Israel's infrastructure and establishing its crucial high-tech industries. The Technion began the historic task of preparing young men and women to build a new nation with one workshop and 17 students. Since then, Technion has been Israel's primary source of technological human resources and the nation's largest comprehensive academic center for advanced scientific and technological education, as well as applied research. Technion graduates have brought the unique skills and penchant for innovation that have helped to build and advance the modern State of Israel – commonly acknowledged to be the "Start-up Nation."

## Technion Industry Liaison Program (TILP)

### About Us

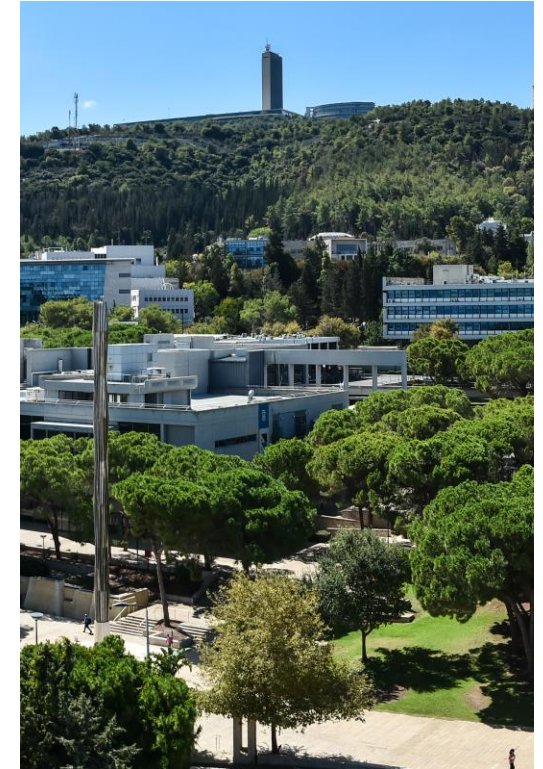

TILP offers unique access and information to its members, including access to a database of future Technion research interests, emerging IP, weekly scientific events happening on campus, and more.

## Technion Industry Liaison Program (TILP)

**Technion - Israel Institute of Technology**  
Technion City,  
Haifa, 3200003

The Technion Industry Liaison Program (TILP) was established by the Technion in response to the current accelerated pace of technological transformation. TILP enables a company to navigate the Technion's resources and establish a direct line of communication with Technion researchers in relevant fields.

---

*"TILP expands interactions between Technion and Industry, allowing member companies access to cutting edge developments in their fields."*

---

The Technion has set to improve and expand reciprocal two-way interactions with industry. A password-protected members-only website was developed, where researchers in search of funding are encouraged to upload descriptions of their work (without revealing confidential information). The website also features presentations on interesting Technion research. TILP members gain access to the site at no additional charge and can browse it, searching for areas of interest, and then arrange further contact with the researchers via their Technion PoC.

## Membership Benefits

### Projects & Technology

- Access to a designated web site with updated information regarding various relevant activities at the Technion, including opportunities to support novel research projects which are available for funding;
- Quarterly updates on the list of IP (patents);
- Quarterly updates on projects in the Drive Accelerator (start-ups initiated by Technion students and alumni);
- Updates regarding new research directions relevant to your company.

### Knowledge Transfer

- Updates on Technion companies searching for investment opportunities;
- Detailed information about faculty who can conduct funded research on specific projects that are of interest for your company.

### Recruitment

- The company has opportunities to recruit students and alumni.

### Exposure & PR

- Information on workshops and conferences initiated by Technion researchers that are relevant for your company;
- Weekly updates on Technion seminars;
- Participation in the BOG (annual meeting of the Technion Board of Governors) including invitation to the Technion President's evening at the BOG;
- Invitations to Technion special events;
- The company will receive copies of reports and publications according to its interest.
